AARON TAGAPAN

IT Operations | Application Support | Systems Analysis | QA/UAT

Los Baños, Laguna, Philippines | aarontagapan@gmail.com
linkedin.com/in/aaron-tagapan1 | github.com/Aaron840588

PROFESSIONAL SUMMARY

BS Information Systems graduate focused on IT operations, application support, systems analysis and QA/UAT. Completed a 486-hour MIS internship at Gardenia Bakeries Philippines supporting requirements documentation, process analysis and testing. Uses AI-assisted coding tools to prototype operational workflows, review implementations and test results. Seeking entry-level IT and business technology opportunities.

TECHNICAL SKILLS

Operations and systems: Windows 10/11, Linux fundamentals (Ubuntu, Kali Linux), VirtualBox, BIOS/UEFI configuration, hardware diagnostics, driver management, PC assembly.
Business systems: Requirements documentation, process flows, functional specifications, QA testing, UAT, data modeling.
Cloud and data: Firebase, Supabase, Vercel, PostgreSQL, Firestore, SQLite, REST APIs, Git/GitHub, CI/CD fundamentals.
Prototyping tools: Python, Java, JavaScript, React, Next.js, FastAPI, HTML/CSS, PHP/Laravel; Google ADK, Gemini API and MCP.

PROFESSIONAL EXPERIENCE

Business Analyst Intern, MIS Department | Gardenia Bakeries Philippines, Inc.
Biñan, Laguna | December 2025 - March 2026 | 486 hours

- Developed functional specification documents for enterprise system enhancements, documenting business requirements, user stories, acceptance criteria, process flows and system workflows.
- Analyzed business processes and translated stakeholder requirements into specifications for a Document Management System integrated with Oracle E-Business Suite metadata.
- Supported QA and UAT: created test scenarios, validated OCR extraction, documented issues and collaborated with technical and business stakeholders.

SELECTED PROJECTS

H+H Hub - Operations Management Prototype | 2026 - Present
Next.js, FastAPI, Supabase/PostgreSQL, Vercel

- Defined operational workflows and iterated on an AI-assisted prototype covering inventory, recipe costing, purchasing and consignment. Reviewed implementation, tested key workflows and documented deployment limits.

Pet-Care CRM - Business Management Prototype | 2026
React, Vite, Firebase/Firestore

- Mapped client, scheduling, billing and key-handling workflows in an AI-assisted React prototype. Prepared a public demo using fictional records, separate from production authentication and data.

AI Automation & Workflow Suite | 2026

- Explored structured data extraction, transcription processing and workflow automation using Python, Google ADK, Gemini API and MCP.

Kapit-Bisig / OK! Calamba - Volunteer Platform Capstone | 2024 - 2026

- Led systems analysis, event workflows and functional documentation for an LGU volunteer-management capstone, collaborating with the development team during planning.

TRAINING

Google Cloud Skills Boost: Agent Fundamentals, Google ADK, MLOps for Generative AI (2026)
Anthropic: MCP Introduction, AI Fluency Framework (2026)
AWS: Foundations of Prompt Engineering (2026)
Microsoft: Generative AI Code Camp (2025)

EDUCATION

BS Information Systems | National University - Laguna | 2022 - 2026
Dean's Lister, multiple semesters
TVL - ICT, Senior High School | STI College Calamba | 2019 - 2021
